Counting and number recognition

Learning objectives

- Count objects carefully
- Read and write numbers from 1 to 20
- Compare which group has more or fewer objects

Lesson notes

A number tells us how many things there are. Count one object at a time and say the number words in order: one, two, three, four, five, and so on.

When counting, touch or point to each object once. Do not skip an object or count the same object twice.

Numbers can be compared. A group with 7 bottle tops has more than a group with 4 bottle tops. Four is fewer than seven.

Worked example

There are 5 mangoes and 3 oranges. 5 is greater than 3, so there are more mangoes. We write 5 > 3.

Revision questions

1 Write the numbers that come after 6, 7 and 8.

2 Draw 4 circles and 6 triangles. Which group has more?

3 Fill in the missing number: 1, 2, __, 4, 5.

Suggested answers

1 7, 8 and 9

2 Triangles; 6 is more than 4

3 3

Naming words (nouns)

Learning objectives

- Explain what a naming word is
- Identify people, animals, places and things
- Use naming words in simple sentences

Lesson notes

A naming word is called a noun. It names a person, animal, place or thing.

Examples of people are teacher, mother and child. Examples of animals are goat, cow and bird. Examples of places are school, home and market. Examples of things are book, cup and ball.

A sentence can contain a naming word: The girl has a book. The words girl and book are nouns.

Worked example

In “The cow eats grass,” cow and grass are naming words.

Revision questions

1 Underline the nouns: The boy kicks a ball.

2 Name two animals and two things found in a classroom.

3 Make one sentence using the word teacher.

Suggested answers

1 boy, ball

2 Possible answers: goat, hen; book, desk

3 Answers will vary; e.g. The teacher reads a book.
