Multiplication as repeated addition

Learning objectives

- Describe multiplication as equal groups
- Write repeated addition as multiplication
- Solve simple multiplication questions

Lesson notes

Multiplication is a quick way of adding equal groups. If there are 3 groups with 4 mangoes in each group, we can add 4 + 4 + 4.

The repeated addition 4 + 4 + 4 equals 12. It can be written as 3 × 4 = 12, meaning 3 groups of 4.

Remember that equal groups contain the same number of objects in each group.

Worked example

5 + 5 + 5 + 5 = 20, so 4 × 5 = 20.

Revision questions

1 Write 3 + 3 + 3 + 3 as a multiplication sentence.

2 6 × 2 = ?

3 There are 4 baskets with 3 oranges in each. How many oranges are there?

Suggested answers

1 4 × 3 = 12

2 12

3 12 oranges

P3 • English

Capital letters and full stops

Learning objectives

- Use capital letters at the beginning of sentences
- Use capital letters for names
- End statements with a full stop

Lesson notes

Begin a sentence with a capital letter. Use capital letters for names of people and places, days of the week, and the word I.

A full stop (.) comes at the end of a statement. It tells the reader that the sentence has ended.

Read your sentence again to check that it begins with a capital letter and ends with the correct punctuation.

Worked example

incorrect: mary lives in kampala correct: Mary lives in Kampala.

Revision questions

1 Rewrite correctly: john goes to school.

2 Add the missing full stop: We play netball

3 Write one sentence about your school.

Suggested answers

1 John goes to school.

2 We play netball.

3 Answers will vary; check capital letter and full stop.
